

STRONGWELL

CORPORATE PROFILE

Strongwell Corporation, formerly Morrison Molded Fiber Glass Company (MMFG), is both the world's largest pultruder of fiber-reinforced composite structural shapes and plate and the nation's largest precaster of polymer concrete products.

With registered professional structural engineers and AutoCAD structural detailing at two locations, Strongwell is also the leading fabricator of structures utilizing pultruded components.

The company is financially strong, technically advanced and has an active product and process development program.

Strongwell's objective is long-term profitable growth. The company plans to achieve that through continuous improvement of all aspects of its business, outstanding quality and customer service, and long-term customer relationships.
